MATH 5660-E01 – Numerical Analysis I

Fall 2026
Department of Mathematical and Statistical Sciences, University of Colorado Denver

Instructor information

Instructor: Julien Langou, email: julien.langou@ucdenver.edu or through Canvas.

Office hours: Mondays from 2:00pm to 3:00pm
Tuesdays from 11:30am to 12:30pm

Course catalog description and requisites

MATH 5660 - Numerical Analysis I - 3 Credits

A first semester course in numerical methods and analysis fundamental to many algorithms encountered in scientific computing, data science, machine learning, and computational models in science and engineering. Rounding errors and numerical stability of algorithms; solution of linear and nonlinear equations; data modeling with interpolation and least-squares; and optimization methods.

This course assumes that students have the equivalent of differential and integral calculus (e.g., MATH 2411), linear algebra (e.g., MATH 3191 or 3195), and computer programming (e.g., MATH 1376 or CSCI 1410).

Prereq: Graduate standing in Applied Mathematics.

Course Goals

Completion of this course will provide you with

1. an understanding of the basic theory of solving mathematical problems with computers while being cognizant of floating-point arithmetic including issues of overflow and underflow.
2. knowledge of the different issues surrounding errors in using numerical methods including machine epsilon, error analysis, convergence, rounding error, truncation error, and norms.
3. an appreciation of the difficulties involved in finding reliable solutions as well as be able to apply various methods for estimating errors in solutions in order to judge how reliable those solutions are.
4. an awareness of conditioning of problems and stability of algorithms and the distinguish between the two.

Programming Language

We will be using Python through Google Colab Jupyter Notebook (https://colab.research.google.com/).

Course materials and procedures

Textbook. Numerical Analysis, 3rd edition by Tim Sauer, ISBN-13: 9780137982189, published by Pearson, in 2018, updated in 2022. The link to the textbook is https://www.pearson.com/en-us/subject-catalog/p/numerical-analysis/P200000006340/9780137982189.
More procedures. Assignments and additional course materials will be posted on Canvas. Announcements, including any revisions to this syllabus, will be announced and posted on Canvas.

Evaluation

During the semester, grades will be posted on Canvas. Students should regularly check their recorded grades, and immediately bring any discrepancies or disputes to the attention of the instructor. Note that the grade calculation capabilities of Canvas are limited and may not be accurate. Use the grading scheme as described in this syllabus to compute your course grade.

You are encouraged to work together in groups outside of class, as well as consult other resources. However, your solutions must be your own. Any submitted solutions that I feel have been mostly copied from other sources, including classmates, textbooks, or the web, will receive no credit. See also the later discussion on academic honesty.

Homework (5% × 6 = 30%). There will be 7 homework during the semester. Each homework is worth 10% of the final grade. For each homework, you need to turn in a "Google Colab Jupyter Notebook shared link" and a PDF with handwritten or typed solutions. The homework will be made with some questions from the textbook, some "reality check" from the textbook, and/or some questions written by your instructor.

Homework (5% × 7 = 35%). There will be 7 homework during the semester. Each homework is worth 5% of the final grade. For each homework, you need to turn in a "Google Colab Jupyter Notebook shared link" and a PDF with handwritten or typed solutions. The homework will be made with some questions from the textbook, some "reality check" from the textbook, and/or some questions written by your instructor.

Project (5% × 6 = 30%). There will be 3 "reality check" projects during the semester. Each project is worth 10% of the final grade. For each reality check, you need to turn in a "Google Colab Jupyter Notebook shared link" and a PDF with handwritten or typed solutions.

Quiz (2.5% × 8 = 20%). There will be 14 "quiz" projects during the semester. We take score for best 8. Each quiz is worth 2.5% of the final grade.

Final (15% × 1 = 15%). There will be 1 final exam. The final exam is worth 15% of the final grade.

Final course grade scale. Final course letter grades will be assigned according to a student's total course score (calculated as described above). Letter grades for specific scores are given in the following table.

≥ 93%	A	≥ 87%	B+	≥ 77%	C+	≥ 60%	D	< 60%	F
≥ 90%	A-	≥ 83%	B	≥ 70%	C				
		≥ 80%	B-						

Numerical Analysis, Third Edition, Timothy Sauer

Chapter 0		Fundamentals	
	0.1	Evaluating a Polynomial	week 1 / week 2
	0.2	Binary Numbers	week 1 / week 2
		0.2.1 - Decimal to binary	week 1 / week 2
		0.2.2 - Binary to decimal	week 1 / week 2
	0.3	Floating Point Representation of Real Numbers	week 1 / week 2
		0.3.1 - Floating point formats	week 1 / week 2
		0.3.2 - Machine representation	week 1 / week 2
		0.3.3 - Addition of floating point numbers	week 1 / week 2
	0.4	Loss of Significance	week 1 / week 2
	0.5	Review of Calculus	week 1 / week 2
Chapter 1		Solving Equations	
	1.1	The Bisection Method	week 3 / week 4
		1.1.1 - Bracketing a root	week 3 / week 4
		1.1.2 - How accurate and how fast?	week 3 / week 4
	1.2	Fixed-Point Iteration	week 3 / week 4
		1.1.1 - Fixed points of a function	week 3 / week 4
		1.2.2 - Geometry of Fixed-Point Iteration	week 3 / week 4
		1.2.3 - Linear convergence of Fixed-Point Iteration	week 3 / week 4
		1.2.4 - Stopping criteria	week 3 / week 4
	1.3	Limits of Accuracy	week 3 / week 4
		1.3.1 - Forward and backward error	week 3 / week 4
		1.3.2 - The Wilkinson polynomial	week 3 / week 4
		1.3.3 - Sensitivity of root-finding	week 3 / week 4
	1.4	Newton's Method	week 3 / week 4
		1.4.1 - Quadratic convergence of Newton's Method	week 3 / week 4
		1.4.2 - Linear convergence of Newton's Method	week 3 / week 4
	1.5	Root-Finding without Derivatives	week 3 / week 4
		1.5.1 - Secant Method and variants	week 3 / week 4
		1.5.2 - Brent's Method	week 3 / week 4
Reality Check 1		Kinematics of the Stewart platform	week 6
Chapter 2		Systems of Equations	
	2.1	Gaussian Elimination	week 5 / week 6
		2.1.1 - Naive Gaussian elimination	week 5 / week 6
		2.1.2 - Operation counts	week 5 / week 6
	2.2	The LU Factorization	week 5 / week 6
		2.2.1 - Matrix form of Gaussian elimination	week 5 / week 6
		2.2.2 - Back substitution with the LU factorization	week 5 / week 6
		2.2.3 - Complexity of the LU factorization	week 5 / week 6
	2.3	Sources of Error	week 5 / week 6
		2.3.1 - Error magnification and condition number	week 5 / week 6
		2.3.2 - Swamping	week 5 / week 6
	2.4	The PA = LU Factorization	week 5 / week 6
		2.4.1 - Partial pivoting	week 5 / week 6
		2.4.2 - Permutation matrices	week 5 / week 6
		2.4.3 - PA = LU factorization	week 5 / week 6
Reality Check 2		The Euler–Bernoulli Beam	week 8
	~~2.5~~	~~Iterative Methods~~	
		~~2.5.1 - Jacobi Method~~	
		~~2.5.2 - Gauss–Seidel Method and SOR~~	
		~~2.5.3 - Convergence of iterative methods~~	
		~~2.5.4 - Sparse matrix computations~~	
	~~2.6~~	~~Methods for symmetric positive-definite matrices~~	
		~~2.6.1 - Symmetric positive-definite matrices~~	
		~~2.6.2 - Cholesky factorization~~	
		~~2.6.3 - Conjugate Gradient Method~~	
		~~2.6.4 - Preconditioning~~	
	2.7	Nonlinear Systems of Equations	week 5 / week 6
		2.7.1 - Multivariate Newton's Method	week 5 / week 6
		2.7.2 - Broyden's Method	week 5 / week 6
Chapter 3		Interpolation	
	3.1	Data and Interpolating Functions	week 7 / week 8
		3.1.1 - Lagrange interpolation	week 7 / week 8
		3.1.2 - Newton's divided differences	week 7 / week 8
		3.1.3 - How many degree d polynomials pass through n points?	week 7 / week 8
		3.1.4 - Code for interpolation	week 7 / week 8
		3.1.5 - Representing functions by approximating polynomials	week 7 / week 8
	3.2	Interpolation Error	week 7 / week 8
		3.2.1 - Interpolation error formula	week 7 / week 8
		3.2.2 - Proof of Newton form and error formula	week 7 / week 8
		3.2.3 - Runge phenomenon	week 7 / week 8
	3.3	Chebyshev Interpolation	week 7 / week 8
		3.3.1 - Chebyshev's theorem	week 7 / week 8
		3.3.2 - Chebyshev polynomials	week 7 / week 8
		3.3.3 - Change of interval	week 7 / week 8
	~~3.4~~	~~Cubic Splines~~	
		~~3.4.1 - Properties of splines~~	
		~~3.4.2 - Endpoint conditions~~	
	~~3.5~~	~~Bézier Curves~~	
Reality Check 3		Fonts from Bézier curves	week 10
Chapter 4		Least Squares	
	4.1	Least Squares and the Normal Equations	week 9 / week 10
		4.1.1 - Inconsistent systems of equations	week 9 / week 10
		4.1.2 - Fitting models to data	week 9 / week 10
		4.1.3 - Conditioning of least squares	week 9 / week 10
	4.2	A Survey of Models	week 9 / week 10
		4.2.1 - Periodic data	week 9 / week 10
		4.2.2 - Data linearization	week 9 / week 10
	4.3	QR Factorization	week 9 / week 10
		4.3.1 - Gram–Schmidt orthogonalization and least squares	week 9 / week 10
		~~4.3.2 - Modified Gram-Schmidt orthogonalization~~	
		~~4.3.3 - Householder reflectors~~	
	~~4.4~~	~~Generalized Minimum Residual (GMRES) Method~~	
		~~4.4.1 - Krylov methods~~	
		~~4.4.2 - Preconditioned GMRES~~	
	4.5	Nonlinear Least Squares	week 9 / week 10
		4.5.1 - Gauss-Newton Method	week 9 / week 10
		4.5.2 - Models with nonlinear parameters	week 9 / week 10
		4.5.3 - The Levenberg-Marquardt Method	week 9 / week 10
Reality Check 4		GPS, Conditioning, and Nonlinear Least Squares	week 12
Chapter 5		Numerical Differentiation and Integration	week 11 / week 12
	5.1	Numerical Differentiation	week 11 / week 12
		5.1.1 - Finite difference formulas	week 11 / week 12
		5.1.2 - Rounding error	week 11 / week 12
		5.1.3 - Extrapolation	week 11 / week 12
		5.1.4 - Symbolic differentiation and integration	week 11 / week 12
	5.2	Newton–Cotes Formulas for Numerical Integration	week 11 / week 12
		5.2.1 - Trapezoid Rule	week 11 / week 12
		5.2.2 - Simpson's Rule	week 11 / week 12
		5.2.3 - Composite Newton–Cotes formulas	week 11 / week 12
		5.2.4 - Open Newton–Cotes Methods	week 11 / week 12
	5.3	Romberg Integration	week 11 / week 12
	5.4	Adaptive Quadrature	week 11 / week 12
	5.5	Gaussian Quadrature	week 11 / week 12
Reality Check 5		Motion Control in Computer-Aided Modeling	week 14
Chapter 12			week 13 / week 14 / week 15
	12.1	Power Iteration Methods	week 13 / week 14 / week 15
		12.1.1 - Power Iteration	week 13 / week 14 / week 15
		12.1.2 - Convergence of Power Iteration	week 13 / week 14 / week 15
		12.1.3 - Inverse of Power Iteration	week 13 / week 14 / week 15
		12.1.4 - Rayleigh Quotient Iteration	week 13 / week 14 / week 15
	12.2	QR Algorithm	week 13 / week 14 / week 15
		12.2.1 - Simultaneous Iteration	week 13 / week 14 / week 15
		12.2.2 - Real Schur Form and the QR algorithm	week 13 / week 14 / week 15
		12.2.2 - Upper Hessenberg Form	week 13 / week 14 / week 15
	12.3	Singular Value Decomposition	week 13 / week 14 / week 15
		12.3.1 - Geometry of the SVD	week 13 / week 14 / week 15
		12.3.2 - Finding the SVD in general	week 13 / week 14 / week 15
	12.4	Applications of the SVD	week 13 / week 14 / week 15
		12.4.1 - Properties of the SVD	week 13 / week 14 / week 15
		12.4.2 - Dimension reduction	week 13 / week 14 / week 15
		12.4.3 - Compression	week 13 / week 14 / week 15
		12.4.4 - Calculating the SVD	week 13 / week 14 / week 15

University, college, and department policies

Academic Calendar

For university deadlines and procedures (such as the last day to withdraw from a course), please see the Academic Calendar. https://www.ucdenver.edu/student/calendars/academic/

Academic Support

Instructor office hours or other appointments are the best way to get additional help. I'm happy to help with questions not answered during class, additional explanation, or homework assistance.

Other sources of support are

- The Math and Stat Support office is located in the Learning Commons Building Room 1225 and regularly offers CU Denver students free drop-in assistance. Hours of operation, zoom links for virtual options, and other forms of support for mathematics and statistics courses are available on the Math and Stat Support webpage.

  https://clas.ucdenver.edu/mathematical-and-statistical-sciences/math-and-stat-support

- The Learning Resources Center (LRC) provides individual and group tutoring, Supplemental Instruction (SI), study skills workshops, and ESL support.

  https://www.ucdenver.edu/learning-resources-center

- The College of Liberal Arts and Sciences has a summary of campus academic support and school/college advising offices.

  https://clas.ucdenver.edu/faculty-staff/content/clas-academic-policies-deadlines

Recording of Class Meetings

Class meetings held on or streamed over a video conferencing platform (such as Zoom, Microsoft Teams, etc) may be recorded and posted for all members of the class. Student participation and interaction may be included in the recording. If you have any concerns about this, please contact the instructor.

Diversity Statement

It is my intent that students from all diverse backgrounds and perspectives be well served by this course, that students' learning needs be addressed both in and out of class, and that the diversity that students bring to this class be viewed as a resource, strength and benefit. It is my intent to present materials and activities that are respectful of diversity: gender, sexuality, disability, age, socioeconomic status, ethnicity, race, and culture, etc. I would like to create a learning environment for my students that supports a diversity of thoughts, perspectives and experiences, and honors your identities (including race, gender, class, sexuality, religion, ability, etc). To help accomplish this:

- If you have a name and/or set of pronouns that differ from those that appear in your official records, please let me know!
- If you feel like your performance in the class is being impacted by your experiences outside of class, please don't hesitate to come and talk with me. I want to be a resource for you. Remember that you can also submit anonymous feedback (which will lead to me making a general announcement to the class, if necessary to address your concerns). If you prefer to speak with someone outside of the course, the Office of Diversity, Equity and Inclusion, is an excellent resource.
- I (like many people) am still in the process of learning about diverse perspectives and identities. If something was said in class (by anyone) that made you feel uncomfortable, including by me, please talk to me about it. (Again, anonymous feedback is always an option).

Your suggestions are encouraged and appreciated. Please let me know ways to improve the effectiveness of the course for you personally or for other students or student groups. In addition, if any of our class meetings conflict with your religious or other cultural events, please let me know so that we can make arrangements for you.

Health and Wellness

As a student, you may experience a range of challenges that can interfere with learning, such as strained relationships, traumas, increased anxiety, substance use, feeling down, difficulty concentrating, and/or lack of motivation. These mental health concerns or stressful events may diminish your academic performance and/or reduce your ability to participate in daily activities. If you or someone you know is struggling, you can find supportive campus and community resources at the Health Center at Auraria or the CU Denver Counseling Center. On weekends, holidays or after-hours you can contact the 24/7 Mental Health Crisis and Victim Assistance Line at 303-615-9911.

The University of Colorado Denver is committed the health and well-being of all students. We recognize that diminished mental health, including significant stress, mood changes, excessive worry, or problems with eating and/or sleeping can interfere with optimal academic performance. The source of such symptoms can be quite varied, and include experiences of trauma (such as sexual and relationship violence, stalking, discrimination, crimes, and accidents), responses to course work, family worries, loss, personal struggle, or crisis. If you or someone you know is struggling, you can find supportive campus and community resources at

https://www.ucdenver.edu/counseling-center

or by calling the CU Denver Counseling Center (303-315-7270) or the Health Center at Auraria (303-615-9999). On weekends, holidays or after-hours you can contact the 24/7 Mental Health Crisis and Victim Assistance Line at 303-615-9911.

Disability Accommodation and Access

The University of Colorado Denver is committed to ensuring the full participation of all students in its programs, including students with disabilities. If you have a disability or think you have a disability and need accommodations to succeed in this course, I encourage you to contact Disability Resources and Services (DRS) and/or speak with me as soon as you can. DRS is located in Student Commons Building Suite 2116, and can be reached at disabilityresources@ucdenver.edu and online at https://www.ucdenver.edu/offices/disability-resources-and-services. I am committed to providing equal access as required by federal law, and I am interested in developing strategies for your success in this course.

Nondiscrimination and Sexual Misconduct

The University of Colorado Denver is committed to maintaining a positive learning, working and living environment. University policy and Title IX prohibit discrimination on the basis of race, color, national origin, sex, age, disability, pregnancy, creed, religion, sexual orientation, veteran status, gender identity, gender expression, political philosophy or political affiliation in admission and access to, and treatment and employment in, its educational programs and activities. University policy prohibits sexual misconduct, including harassment, domestic and dating violence, sexual assault, stalking, or related retaliation. If you have experienced any sort of sexual misconduct or discrimination, please visit the Office of Equity web site at https://www.ucdenver.edu/offices/equity to understand the resources available to you or contact the Office of Equity/Title IX Coordinator at equity@ucdenver.edu.

Please note that I am a Responsible Employee, which means that if I witness or receive information regarding possible prohibited protected characteristic discrimination or harassment, any form of sexual misconduct, and/or related retaliation, I am required to promptly report the information to the Office of Equity or their designee.

Religious Holiday Accommodation

Faculty in the University of Colorado system provide reasonable accommodations to students who must be absent from classes because of religious holidays. If you will miss class or graded assignments in order to observe religious holidays, you must contact me with all course conflicts by the end of the first week of classes.

Student Code of Conduct

As members of the University community, students are expected to uphold university standards, which include abiding by state civil and criminal laws and all University policies and standards of conduct. These standards are outlined in the student code of conduct, which can be found at https://www.ucdenver.edu/student/wellness/student-conduct

Academic Honesty

Students are expected to know, understand, and comply with the ethical standards of the university. A university's reputation is built on a standing tradition of excellence and scholastic integrity. As members of the University of Colorado Denver academic community, faculty and students accept the responsibility to maintain the highest standards of intellectual honesty and ethical conduct.

Academic dishonesty is defined as a student's use of unauthorized assistance with intent to deceive an instructor or other such person who may be assigned to evaluate the student's work in meeting course and degree requirements.

This course assumes your knowledge of the policies and definitions. University policies allow the instructor to decide how to respond to an ethics violation, whether by lowering the assignment grade, lowering the course grade, and/or filing charges against the student with the campus Office of Student Conduct. For more information regarding the Office of Student Conduct policies and procedures, please refer to https://www.ucdenver.edu/student/wellness/student-conduct/academic-integrity. Violating the academic honor code can lead to expulsion from the University.

Examples of academic dishonesty include, but are not limited to, the following:

Plagiarism. Plagiarism is the use of another person's distinctive words or ideas without acknowledgment. Examples include:

1. Word-for-word copying of another person's ideas or words;
2. The mosaic (the interspersing of one's own words here and there while, in essence, copying another's work);
3. The paraphrase (the rewriting of another's work, yet still using their fundamental idea or theory);
4. Fabrication of references (inventing or counterfeiting sources);
5. Submission of another's work as one's own;
6. Neglecting quotation marks on material that is otherwise acknowledged.

Acknowledgment is not necessary when the material used is common knowledge.

Cheating. Cheating involves the possession, communication, or use of information, materials, notes, study aids or other devices not authorized by the instructor in an academic exercise, or communication with another person during such an exercise. Examples include:

1. Copying from another's paper or receiving unauthorized assistance from another during an academic exercise or in the submission of academic material;
2. Using a calculator when its use has been disallowed;
3. Collaborating with another student or students during an academic exercise without the consent of the instructor.

Note on use of Generative AI. Generative AI tools such as ChatGPT may not be used on exams, tests, or quizzes that do not permit the use of outside resources. The instructor will provide guidelines on whether such tools can be used for assignments and projects.

Fabrication and Falsification. Fabrication involves inventing or counterfeiting information, i.e., creating results not obtained in a study or laboratory experiment. Falsification, on the other hand, involves the deliberate alteration of results to suit one's needs in an experiment or other academic exercise.

Multiple Submissions. This is the submission of academic work for which academic credit has already been earned, when such submission is made without instructor authorization.

Misuse of Academic Materials. The misuse of academic materials includes, but is not limited to, the following:

1. Stealing or destroying library or reference materials or computer programs;
2. Stealing or destroying another student's notes or materials, or having such materials in one's possession without the owner's permission;
3. Receiving assistance in locating or using sources of information in an assignment when such assistance has been forbidden by the instructor;
4. Illegitimate possession, disposition, or use of examinations or answer keys to examinations;
5. Unauthorized alteration, forgery, or falsification;
6. Unauthorized sale or purchase of examinations, papers, or assignments.

Complicity in Academic Dishonesty. Complicity involves knowingly contributing to another's acts of academic dishonesty. Examples include:

1. Knowingly aiding another in any act of academic dishonesty;
2. Allowing another to copy from one's paper for an assignment or exam;
3. Distributing test questions or information about the materials to be tested before the scheduled exercise;
4. Taking an exam or test for someone else;
5. Signing another's name on attendance roster or on an academic exercise.

Incomplete Policy

When a student has special circumstances that make it impossible to complete course assignments, faculty members may choose to award an incomplete grade. All incomplete courses are assigned a grade of Incomplete (I). Incomplete grades are not awarded for poor academic performance or as a way of extending assignment deadlines. Faculty are not required to award an Incomplete.

To be eligible for an Incomplete grade, students MUST:

- Have participated in the class for a significant proportion of the term.
- Have successfully completed a significant proportion of the course assignments.
- Have special circumstances (verification may be required) that preclude the student from attending class and/or completing graded assignments.
- Make arrangements to complete missing assignments with the original instructor by a mutually agreed upon date but within one calendar year. Note that it is not the instructor's responsibility to teach the student missed material.
- Both the instructor and student should complete and sign a Course Completion Agreement found at

  https://clas.ucdenver.edu/faculty-staff/content/incomplete-grade-policy

- The instructor gives a copy of the signed Course Completion Agreement to the department.

Incompletes cannot:

- require a student to repeat the entire course,
- repeat or replace existing grades,
- allow the student an indeterminate period of time to complete a course, or
- allow the student to repeat the course with a different instructor.

Student Grievances

Students who have concerns about the course or instructor should first contact the instructor to discuss the issue. If the issue is not resolved, the student should next contact the Associate Chair of the Department of Mathematical and Statistical Sciences (currently Stephen Hartke <stephen.hartke@ucdenver.edu>). If not satisfied, the student should then appeal to the appropriate Associate Dean of the student's home school or college (for CLAS, this is the Associate Dean for Student Success). No step in this process should be skipped.
