Numerical Analysis, Third Edition, Timothy Sauer		
Chapter 0	Fundamentals	
0.1	Evaluating a Polynomial Binary Numbers	week 1 week 1
	0.2.1 - Decimal to binary 0.2.2 - Binary to decimal	week 1 week 1
0.3	Floating Point Representation of Real Numbers	week 1
	0.3.1 - Floating point formats 0.3.2 - Machine representation	week 1 week 1
0.4	0.3.3 - Addition of floating point numbers Loss of Significance	week 1 week 1
	Review of Calculus	week 1
	Solving Equations	
1.1	The Bisection Method 1.1.1 - Bracketing a root	week 2 week 2
1.2	1.1.2 - How accurate and how fast? Fixed-Point Iteration	week 2 week 2
	1.1.1 - Fixed points of a function 1.2.2 - Geometry of Fixed-Point Iteration	week 2 week 2
	1.2.3 - Linear convergence of Fixed-Point Iteration	week 2
1.3	1.2.4 - Stopping criteria Limits of Accuracy	week 2 week 2
	1.3.1 - Forward and backward error 1.3.2 - The Wilkinson polynomial	week 2 week 2
1.4	1.3.3 - Sensitivity of root-finding Newton's Method	week 2 week 2
1.4	1.4.1 - Quadratic convergence of Newton's Method	week 2
1.5	1.4.2 - Linear convergence of Newton's Method Root-Finding without Derivatives	week 2 week 2
	1.5.1 - Secant Method and variants 1.5.2 - Brent's Method	week 2 week 2
Reality Check 1	Kinematics of the Stewart platform	week 8
	Systems of Equations	
2.1	Gaussian Elimination 2.1.1 - Naive Gaussian elimination	week 3 week 3
2.2	2.1.2 - Operation counts The LU Factorization	week 3 week 3
2.2	2.2.1 - Matrix form of Gaussian elimination	week 3
	2.2.2 - Back substitution with the LU factorization 2.2.3 - Complexity of the LU factorization	week 3 week 3
2.3	Sources of Error 2.3.1 - Error magnification and condition number	week 3 week 3
	2.3.2 - Swamping	week 3
2.4	The PA = LU Factorization 2.4.1 - Partial pivoting	week 3 week 3
	2.4.2 - Permutation matrices 2.4.3 - PA = LU factorization	week 3 week 3
	The Euler–Bernoulli Beam	week 8
	2.5.1 - Jacobi Method	
	2.5.2 - Gauss-Seidel Method and SOR 2.5.3 - Convergence of iterative methods	
2.6	2.5.4 Sparse matrix computations  Methods for symmetric positive definite matrices	
	2.6.1 Symmetric positive definite matrices	
	2.6.3 Conjugate Gradient Method	
	2.6.4 Preconditioning	
2.7	Nonlinear Systems of Equations	week 3
2.7	2.7.1 - Multivariate Newton's Method	week 3
	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method	
Chapter 3	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method Interpolation Data and Interpolating Functions	week 3 week 3
Chapter 3	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method Interpolation	week 3 week 3
Chapter 3	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method Interpolation Data and Interpolating Functions 3.1.1 - Lagrange interpolation 3.1.2 - Newton's divided differences 3.1.3 - How many degreed polynomials pass through n points?	week 3 week 3 week 4 week 4 week 4 week 4
Chapter 3 3.1	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method Interpolation Data and Interpolating Functions 3.1.1 - Lagrange interpolation 3.1.2 - Newton's divided differences 3.1.3 - How many degreed polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials	week 3 week 4 week 4 week 4 week 4 week 4 week 4
Chapter 3 3.1	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method Interpolation Data and Interpolation 3.1.1 - Lagrange interpolation 3.1.2 - Newton's divided differences 3.1.3 - New many degreed polynomials pass through n points? 3.1.4 - Code for interpolation	week 3 week 4 week 4 week 4 week 4 week 4 week 4 week 4 week 4
Chapter 3 3.1	2.7.1 - Nulltivariate Newton's Method 2.7.2 - Broyden's Method Interpolation Data and Interpolating Functions 3.1.1 - Lagrange interpolation 3.1.2 - Newton's divided differences 3.1.3 - New how any degree d polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials interpolation Error 3.2.1 - Interpolation error formula 3.2.1 - Prodoff Newton form and error formula	week 3 week 4 week 4 week 4 week 4 week 4 week 4 week 4
Chapter 3 3.1 3.2	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method  Interpolation Data and Interpolating Functions 3.1.1 - Lagrange interpolation 3.1.2 - Newton's divided differences 3.1.3 - How many degree d polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials interpolation Error 3.2.1 - Interpolation error formula 3.2.2 - Proof of Newton form and error formula 3.2.3 - Runge phenomenon Chebyshev Interpolation	week 3 week 4
Chapter 3 3.1 3.2	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method  Interpolation Data and Interpolating Functions 3.1.1 - Lagrange interpolation 3.1.2 - Newton's divided differences 3.1.3 - How many degree of polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials interpolation Error 3.2.1 - Interpolation error formula 3.2.2 - Proof of Newton form and error formula 3.2.2 - Representing functions of the proof of Newton form and error formula 3.2.3 - Chebyshev interpolation 3.3.1 - Chebyshev interpolation 3.3.1 - Chebyshev polynomials	week 3 week 4
Chapter 3 3.1 3.2 3.3	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method Interpolation Data and Interpolating Functions 3.1.1 - Lagrange interpolation 3.1.2 - Newton's divided differences 3.1.3 - New any degreed polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials interpolation Error 3.2.1 - Interpolation error formula 3.2.2 - Proof of Newton form and error formula 3.2.3 - Runge phenomenon Chebyshev Interpolation 3.3.1 - Chebyshev Sheorem	week 3 week 4
Chapter 3 3.1 3.2 3.3	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method Data and Interpolation Data and Interpolation 3.1.1 - Lagrange interpolation 3.1.2 - Newton's divided differences 3.1.3 - How many degreed polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials interpolation Error 3.2.1 - Interpolation error formula 3.2.2 - Proof of Newton form and error formula 3.2.3 - Runge phenomenon Chebyshev Interpolation 3.3.1 - Chebyshev Stheorem 3.3.2 - Chebyshev Stheorem 3.3.2 - Chebyshev polynomials 3.3.3 - Change of interval	week 3 week 4
Chapter 3 3.1 3.2 3.2 3.3	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method Interpolation Data and Interpolating Functions 3.1.1 - Lagrange interpolation 3.1.2 - Newton's divided differences 3.1.3 - How many degreed polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials interpolation Error 3.2.1 - Interpolation error formula 3.2.2 - Proof of Newton form and error formula 3.2.3 - Runge phenomenon Chebysher Interpolation 3.3.1 - Chebyshev's theorem 3.3.2 - Chapte of interval Cubic Spiline 2.4.1 - Engiperies of cplines	week 3 week 4
Chapter 3 3.1 3.2 3.2 3.3 3.4 A.C. Reality Cheek 3	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method Interpolation Data and Interpolating Functions 3.1.1 - Lagrange interpolation 3.1.2 - Newton's divided differences 3.1.3 - How many degreed polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials interpolation Error 3.2.1 - Interpolation error formula 3.2.2 - Proof of Newton form and error formula 3.2.3 - Runge phenomenon Chebysher Interpolation 3.3.1 - Chebyshev polynomials 3.3.2 - Chebyshev polynomials 3.3.3 - Change of interval Cubic Spiline 2.4.1 - Properties of epilines 2.4.1 - Endpoint conditions Belies Curuse Gents from Betier curves	week 3 week 4
Chapter 3 3.1 3.2 3.3 3.3 3.4 2.4 Reality Cheek 3 Chapter 4	2.7.1 - Nulltivariate Newton's Method 2.7.2 - Broyden's Method Interpolation Data and Interpolating Functions 3.1.1 - Lagrange interpolation 3.1.2 - Newton's divided differences 3.1.3 - Now many degree d polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials interpolation Error 3.2.1 - Interpolation error formula 3.2.2 - Proof of Newton form and error formula 3.2.3 - Runge phenomenon Chebyshev Interpolation 3.3.1 - Chebyshev polynomials 3.3.2 - Chebyshev polynomials 3.3.3 - Chebyshev polynomials 3.3.3 - Chebyshev polynomials 3.3.3 - Chape of interval Chubic Splinas 2.4.1 - Broperties of splinas 2.4.2 - Broperties of splinas 2.4.3 - Broperties of splinas 2.4.4 - Broperties of splinas 2.4.5 - Broperties of splinas 2.4.6 - Broperties of splinas 2.4.6 - Broperties of splinas 2.4.8 - Broperties of splinas 2.4.8 - Broperties of splinas 2.4 - Bropertie	week 3 week 4 week 5
Chapter 3 3.1 3.2 3.3 3.3 3.4 2.4 Reality Cheek 3 Chapter 4	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method Interpolation Data and Interpolating Functions 3.1.3 - Lagrange interpolation 3.1.3 - Newton's divided differences 3.1.3 - How many degreed polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials interpolation Error 3.2.1 - Interpolation error formula 3.2.2 - Proof of Newton form and error formula 3.2.3 - Runge phenomenon Chebyshev Interpolation 3.3.3 - Chebyshev Stheorem 3.3.2 - Chebyshev Stheorem 3.3.2 - Chebyshev polynomials 3.3.3 - Change of interval Cubic Spilace 2.4.1 - Broperitee of Epilines 2.4.1 - Endopeine conditions Relater Curves Fents from Bésier curves Least Squares Least Squares Least Squares Lat.1 - Inconsistent systems of equations	week 3 week 4
Chapter 3 3.1 3.2 3.3 3.3 3.4 2.5 Reality Check 3 Chapter 4 4.1	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method Interpolation Data and Interpolating Functions 3.1.1 - Lagrange interpolation 3.1.2 - Newton's divided differences 3.1.3 - How many degreed polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials Interpolation Error 3.2.1 - Interpolation error formula 3.2.2 - Proof Newton form and error formula 3.2.3 - Runge phenomenon Chebyshev Interpolation 3.3.1 - Chebyshev Interpolation 3.3.2 - Cheps of interval Cubic Spilane 3.3.3 - Change of interval Cubic Spilane 3.4.1 - Engaperite of spilanes 2.4.1 - Engaperite of spilanes Edited Cubic Spilane 2.4.1 - Engaperite of spilanes Edited Cubic Spilane 1.1.1 - Inconsistent systems of equations 4.1.1 - Inconsistent systems of equations 4.1.2 - Conditioning of least squares	week 3 week 4 week 5 week 5 week 5 week 5
Chapter 3 3.1 3.2 3.3 3.3 3.4 2.5 Reality Check 3 Chapter 4 4.1	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method Interpolation Data and Interpolating Functions 3.1.1 - Lagrange interpolation 3.1.2 - Newton's divided differences 3.1.3 - How many degreed polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials Interpolation Error 3.2.1 - Interpolation error formula 3.2.2 - Proof of Newton form and error formula 3.2.3 - Runge phenomenon Chebyshev Interpolation 3.3.1 - Chebyshev Stheorem 3.3.2 - Chebyshev polynomials 3.3.3 - Change of interval Cubic Spilane 3.4.1 - Bropesties of spilanes 2.4.1 - Bropesties of spilanes 2.4.2 - Bropesties of data 4.1.3 - Conditioning of least squares 2.4.1 - Bropesties of spilanes 2.4.2 - Periodic data	week 3 week 4 week 5 week 5 week 5 week 5 week 5
3.2 3.3 3.4 3.6 Reality Cheeks Chapter 4 4.1 4.2	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method Interpolation Data and Interpolating Functions 3.1.1 - Lagrange interpolation 3.1.2 - Newton's divided differences 3.1.3 - How many degreed polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials Interpolation Error 3.2.1 - Interpolation error formula 3.2.2 - Proof of Newton form and error formula 3.2.3 - Runge phenomenon Chebysher Interpolation 3.3.1 - Chebyshev's theorem 3.3.2 - Chedyshev polynomials 3.3.3 - Change of interval Cubic Spilme 2.4.1 - Reposition of epitions 2.4.1 - Endpoint conditions Bedier Curuse Cents from Bedier curves Least Squares Least Squares Least Squares Least Squares 4.1.3 - Conditioning of least squares A.1.1 - Inconsistent systems of equations 4.1.2 - Fitting models to data 4.1.3 - Conditioning of least squares Asurvey of Models 4.2.1 - Periodic data 4.2.2 - Data linearization QR Factorization	week 3 week 4 week 5
3.2 3.3 3.4 3.6 Reality Cheeks Chapter 4 4.1 4.2	2.7.2 - Broyden's Method 2.7.2 - Broyden's Method 2.7.2 - Broyden's Method Data and Interpolating Functions 3.1.1 - Leyarage interpolation 3.1.2 - Newton's divided differences 3.1.3 - How many degree d polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials interpolation Error 3.2.1 - Interpolation error formula 3.2.2 - Proof of Newton form and error formula 3.2.3 - Runge phenomenon Chebyshev Interpolation 3.3.1 - Chebyshev Stheorem 3.3.2 - Chebyshev polynomials 3.3.3 - Change of interval Chebic Spilane 2.4.1 - Bropesties of spilane 2.4.2 - Endpoint conditions 2.6 - Chebyshev Delynomials 3.3.1 - Chebyshev Stheorem 3.3.2 - Change of interval Chebic Spilane 2.4.1 - Bropesties of spilane 2.4.1 - Bropesties of spilane 2.4.1 - Bropesties of spilane 3.4.1 - Inconsistent systems of equations 4.1.2 - Inting models to data 4.1.3 - Conditioning of least squares 4.3.4 - Care James and the Normal Equations 4.1.2 - Feriodic data 4.2.2 - Data linearization QR Factorization 4.3.1 - Gram-Schmidt orthogonalization and least squares	week 3 week 4 week 5 week 5 week 5 week 5 week 5
3.2 3.3 3.4 3.6 Reality Cheeks Chapter 4 4.1 4.2	2.7.2 - Broyden's Method 2.7.2 - Broyden's Method 2.7.2 - Broyden's Method Data and Interpolating Functions 3.1.1 - Leyarage interpolation 3.1.2 - Newton's divided differences 3.1.3 - How many degree d polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials interpolation Error 3.2.1 - Interpolation error formula 3.2.2 - Froof of Newton form and error formula 3.2.3 - Siunge phenomenon Chebyshev Interpolation 3.3.2 - Chebyshev Stheorem 3.3.2 - Chebyshev Stheorem 3.3.3 - Change of interval Chebic Spilace 4.4.1 - Bropastien of Epithase 4.4.1 - Bropastien of Epithase 4.4.1 - Bropastien of Epithase Chebic Spilace 1.4.1 - Inconsistent systems of equations 4.1.2 - Interpolation gof least squares 4.1.3 - Conditioning of least squares ASurvey of Models 4.2.1 - Periodic data 4.2.2 - Data linearization QR Factorization 4.3.1 - Gram-Schmidt orthogonalization and least squares 4.3.1 - Modified Gram-Schmidt orthogonalization 4.3.1 - Gram-Schmidt orthogonalization 4.3.1 - Gram-Schmidt orthogonalization 4.3.3 - Modified Gram-Schmidt orthogonalization	week 3 week 4 week 5
3.2 3.3 3.4 3.6 Reality Cheeks Chapter 4 4.1 4.2	2.7.1 - Multivariate Newton's Method 2.7.2 - Broyden's Method Interpolation Data and Interpolating Functions 3.1.3 - Lagrange interpolation 3.1.3 - Newton's divided differences 3.1.3 - How many degree d polynomials pass through n points? 3.1.4 - Code for interpolation 3.1.5 - Representing functions by approximating polynomials interpolation Error 3.2.1 - Interpolation error formula 3.2.2 - Proof of Newton form and error formula 3.2.3 - Runge phenomenon Chebyshev Interpolation 3.3.3 - Chebyshev polynomials 3.3.3 - Chebyshev polynomials 3.3.3 - Chebyshev polynomials 3.3.3 - Change of interval Cubic Spilans 2.4.1 - Broperitee of epilans 2.4.1 - First Systems of equations 4.1.2 - Interpolation in the Normal Equations 4.1.3 - Conditioning of least squares ASURVEY of Models 4.2.1 - Periodic data 4.2.2 - Data linearization QR Factorization 4.3.1 - Gram-Schmidt orthogonalization and least squares 4.3.1 - Gram-Schmidt orthogonalization 4.3.1 - Gram-Schmidt orthogonalization 4.3.3 - Mangen Redidual (CAMES) Method 4.4.1 - Krylen weetheds	week 3 week 4 week 5
