

Q2-01-A

Let

$$f(x) = \sqrt{x}.$$

1. Find the Taylor polynomial of degree 3 for $f(x)$ about the point $x_0 = 1$.
2. We use this Taylor polynomial to approximate

$$f(0.9) \quad \text{and} \quad f(1.1).$$

Use Taylor's theorem with remainder to find an error formula for the Taylor polynomial. Give an upper bound for the error in each of the two approximations.
